April 24, 1993

President, Russia
The Kremlin

Dear President Yeltsin,

City Solutions Institute's *POL2001* modeling system forecasts that you will win the coming election. The margin of your victory will not be as large as you need to bring about the political reforms you need to achieve your economic objectives. On the basis of these initial forecasts, City Solutions Institute's *POL2001* modeling system forecasts that, if changes are not made to your economic policies now, most of the *democratic reforms* won over the last several years will be lost over the next 48 months. The one exception *POL2001* forecasts is religious reforms that have an 85% probability of remaining intact.

Using the political forecasts above, City Solutions Institute's Artificial Intelligence Simulation Program *ECON2001* forecast that, if your economic reforms are not mitigated soon, Russian cities will undergo dramatic social and economic deterioration because your economic policies will collapse within 36 months. CSI's AI Simulation Systems forecasts indicate that your economic reforms are going to fail to bring the results you had hoped for, and, if not modified, will bring severe hardship to the Russian people living in your cities. *ECON2001* projects that the WEST will not be able to provide enough financial assistance or loans to prevent the above and the Russian economy will not be able to reduce hardships to a level needed to ensure political stability.

CSI will have predicted your winning the mandate to continue with your reforms tomorrow, the beginning of the current economic downturn in the United States, as well as the beginning of the turnaround. City Solutions Institute has successfully predicted three national elections over the last fourteen years. CSI had announced on Compuserve (a national BBS) that President Bush would lose the 92 election. City Solution Institute has also publicly announced that President Clinton will not win the 96 election and that the United States economy will be worse off in 96 than it is now.

Again, CSI does not wish to see city Russian Cities deteriorate because of economic collapse and political instability. POL2001 forecasts strongly indicate you will not have the political muscle required to bring about your reforms. Most of your reforms will be reversed if you continue your current course.

If any of your staff have any questions they may feel free to write or access our BBS in the United States--(617) 547-1250 with a computer modem using the modem protocol of (N,8,1).

Sincerely yours,

Arnold M. Roquerre

The President
The Kremlin

Dear Mr. President:

Last April City Solutions Institute mailed you a letter (see attached) forecasting that your program of reforms would not succeed unless they were slowed. CSI was aware at that time that consultants from Harvard and other like universities were counselling you to continue the pace of your reforms. Time has proved that they were wrong and that CSI was correct.

One year before Tiananmen, CSI had warned the Chinese government of the coming crises. That warning was also ignored. When the student uprising did occur, CSI urged that there be a hard crack down on the students. CSI further stated that the crackdown would be successful.

I urge you to throttle back your reforms. CSI's forecasting system (ECON/POL 2001) projects that many of your reforms will work in time. At the same time, ECON/POL 2001 projects that Russia will not be able reach the degree of free market capitalism you desire within the next 10 years. ECON/POL 2001 projects that you can achieve a strong and healthy economy maintaining a blend of old and new.

The most important projection for you to accept is that you will fail to achieve most of your goals if you do not alter your strategy, now!

If any of your staff have any questions they may call, access our BBS in the United States--(617) 547-1250 using the modem protocol of (N,8,1), contact us via our Internet address Arnold.Roquerre@csi.cambridge.ma.us, or write.

Sincerely yours,

Arnold M. Roquerre

Краткий перевод.

20 декабря 1993г.

Письмо института Сити Салушинс на имя Президента России. В письме в частности говорится о прогнозе предстоящего "провала", проводимых в России реформ. Впрочем, большая часть проблем будет решена, хотя в ближайшие 10 лет Россия не достигнет того уровня, который был намечен.

По намеченному пути желательно идти твердо.

Институт Сити Салушинс, ссылаясь на письмо от 24 апреля 1993г., выражает уверенность в том, что Б. Н. Ельцин победит на предстоящих выборах и 85 процентов задуманных идей могут осуществиться.

В письме указаны контактные телефоны.
